

**Waterproof Laminate Flooring**

# WHAT IS A WATERPROOF LAMINATE FLOOR?

With the look & texture of a hardwood floor, laminate flooring is a low cost, durable & versatile floor covering option that has become increasingly popular in recent years.

Thanks to modern technology, waterproof laminate flooring can be made to suit every room in your home. Our new waterproof laminate is suitable for all residential and light commercial use including bathrooms.

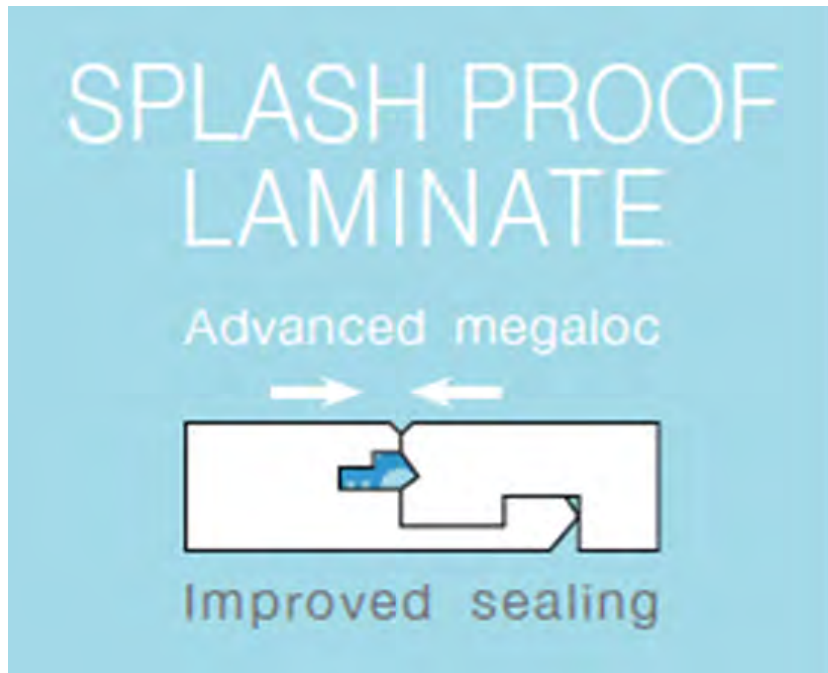

Classen waterproof laminate flooring provides 24-hour protection against water. Equipped with a new, modified Megaloc Aqua Protect assembly system and a revolutionary hydrophobic coating that significantly improves edge swelling resistance.

**Advanced Megaloc System:** The advanced Megaloc system is a newly created, even more powerful locking system that prevents water from passing through the joints. An extra bevel lacquer on the HDF offers full protection against water. This new feature offers the following benefits; Easy and fast installation, super tight joints, water repellent bevel and 24 hour spill proof protection.

**Hydrophobic coating:** The innovative resin composition resists moisture and condensation, eliminating the threat of swelling. Hydrophobic coating is also anti-static which means it repels against dust and dirt making cleaning much easier.

**Waterproof testing:** Product tested in the Classen laboratory showed no water seeping through the joints after 24 hours of having water lying on the floor. Tested according to NALPHA Norm USA.

**OAK GREY MIX**

**OAK BROWN MIX**

With our new waterproof laminate the design and durability of your floor can finally go hand in hand together. The original character of the joints is in perfect balance with the design of the floor. The European quality design and colour variation extends throughout the floor and creates the feeling of real wood, for a fraction of the price. The 15 year manufacturers warranty offers you that peace of mind for years of hassle free cleaning and no moisture problems.
